PROJECTS

TripNest – Full Stack AI Travel Planning Platform | React.js, Node.js, Express.js, MongoDB, REST APIs 2026

- Built a full-stack travel platform with component-based React.js frontend and scalable Node.js/Express.js backend, enabling users to discover destinations and manage trips
- Designed secure REST APIs with authentication flows and applied basic system design principles; integrated MongoDB for data storage and deployed on Vercel with Git/GitHub
- Developed a fully responsive, cross-browser compatible UI for consistent experience across desktop and mobile

Human Heart Disease Prediction System | Python, Scikit-learn, SMOTE, Pandas Dec 2025

- Built a classification pipeline using Logistic Regression and Random Forest to predict heart disease risk from multiple health indicators, demonstrating Python and data analysis proficiency
- Applied SMOTE to correct class imbalance and performed end-to-end data preprocessing with Pandas and NumPy

INTERNSHIPS

Web Developer Intern

Prodigy Infotech

Jun 2025 – Jul 2025

Remote

- Developed 3+ responsive web applications using HTML, CSS, and JavaScript with consistent, cross-browser compatible UI
- Optimized application performance, accessibility, and cross-browser compatibility, improving user experience
- Managed source code with Git/GitHub and deployed projects to cloud platforms in collaboration with the team
